

VOICES FROM OUR COMMUNITIES

“The Alliance for the Chesapeake Bay is proud to partner with Luck Companies and to recognize its leadership role in supporting environmental stewardship efforts

across the Chesapeake Bay watershed. As a founding member of Businesses for the Bay, Luck Companies shares the Alliance’s commitment to restoring clean water to local rivers and streams. Through their long-term commitment toward sustainable operations, Luck Companies is focused on preserving and protecting the environment that will have a positive impact in our Chesapeake region for generations to come!”

**- Kate Fritz, CEO
Alliance for the Chesapeake Bay**

“For many years, Luck Stone has been both an inspiration for and a direct supporter of the Farmville Chamber of Commerce,

helping to keep our economic climate strong and growing. They sponsor our Leadership Farmville Youth Summit and our annual golf tournament. It’s clear Luck Stone is invested beyond providing a service—they want to connect, they want to follow up, they want to support our community. You could say Luck Stone provides the building blocks for our community.”

**- Anne Tyler Paulek, Executive Director
Farmville Chamber of Commerce**

“At Stone-Robinson Elementary our vision is that our learners become lifelong contributors and leaders in our dynamic and diverse society. An important part of our work is building relationships with families and community partners to ensure every student succeeds. Luck Stone is an amazing partner, providing support for our students and faculty. Most recently they provided a generous donation to fund playground equipment in the form of a ninja course for third

through fifth graders. The equipment offers students a new place to play and builds their strength, agility and confidence. Our partners at Luck Stone also provide an impressive “welcome back to school” lunch spread for our faculty and staff, complete with prizes. It’s a really wonderful way to begin the year, reminding our team how much they are appreciated by our community.”

**- Angela Stokes, Principal
Stone-Robinson Elementary**

“Because of our partnership with Luck Companies, our STEM programming is robust and our students are able to explore their interests through the educational experience in this area. Through the diesel mechanic and heavy equipment operator programs Luck Companies supports, we are also able to do our part to educate the workforce of the future and help fill the skills gap.”

**- Bruce Watson, Director, Career and Technical Education
Goochland County Public Schools**

“VCU and the Rice Rivers Center are clearly assets for the City of Richmond, and Luck has an environmental ethic. So to be able to support a program that does good environmental science and aids the state to develop better environmental policies, they like being a part of that.”

**- Greg Garman, Ph.D.
Director, VCU Rice
Rivers Center**

“With just one phone call to our new community members, Luck Stone, we were able to get supplies we needed to support an after-school reading program in Clayton County, Georgia.”

**- Felicia Franklin Warner, Commissioner
Clayton County, GA**
